

Eracle bookcase

STORAGE UNITS

2010

Antonio Citterio

Description

Eracle is a series of multipurpose storage units in different sizes, fitted with doors, shelves and drawers or designed as open bookcases. A simple, defined design with front faces marked with strip that underscore the doors and the unexpected lacquered interior, that embodies a graceful Eastern sophistication capable of hiding at first glance to reveal at a later moment. Other details enrich these storage units: the upper top creates a tray and the hinged plate functions as a handle.

Technical information

External frame

solid wood, wood particles panel, MDF wood fibre panel, veneered multi-layered wood panel

Base-frame

steel profiles

Shelf

plywood panel with honeycomb-core

Feet

steel and plastic material

ARL1
